There was a kung fu school in a village. It was not just kung fu school but also it was a place where people learn many other subjects like science, math, logic, music and language. In that school, once the students got a task to bring a medicine which was at the mountain. The medicine should be brought before dawn for the treatment of people who were affected by a viral disease.

A group of four students was formed. All of them at 12.00 'o' clock at night took their bags and went towards the forest.

Before reaching to the mountain, they have to cross many obstacles. And the forest was their first obstacles. When they were to almost cross the forest, a lion came in their way. They all have different weapons. First student had brought three-section-staff (a kung fu weapon). Second, a chain

whip. Third, a wooden staff. And forth had only bag with water and sand.

First student holds the lion with his three-section staff and other went forward.

Other went forward and reached the hill.

They were climbing the hill then suddenly 4th student fells, but second student throws

his chain whip. 4th students hand locked in chain whip. He was saved but his hand was badly injured. They moved on and reached to river. They had to cross the river to get to another side. 2nd student helped the 4th student to sat down under a tree and take rest.

Now they two were thinking that how they could cross the river (due to rain the river was flooded and waves were very high).

They thought an idea; they tied the chain whip with staff. They locked a branch of tree at another side with the newly invented weapon.2nd student managed to cross the river but 3rd student was taken by the waves of river. 2nd student found the medicine and came back to the river. The invented weapon was destroyed by river waves.

It was to dawn and wolfs used to drink water at that time besides the river. 2nd student took off his shirt and ties the medicine and a stone in it, then throws it to 4th student who was at another side of river. 4th student managed to come back and the village people were healed by the medicine.

On the way 4th student was returning he had seen a three-section staff near a skeleton (meat eaten by lion).

All village people used to honour them (died students) by praying together near the school.
